A journey in Made in Italy foodservice

www.genusdei.it

OUR MADE IN ITALY COMPANY

After 15 years of activity and constant presence in the foodservice equipment market, Genus Dei S.r.l. continues its commitment and dedication to providing innovation and quality to its customers. Our main goal is to provide products that are resistant, durable, safe and practical to use.

In this special edition, Genus Dei S.r.l. will accompany you on a journey through the most famous Italian cities, to discover the results of its own production Made in Italy.

The experience gained over the years has allowed us to expand our range of products and our distribution network, currently active in more than 60 countries around the world.

With the innovative introduction of **QR CODES** in the catalogue, it will be possible to fully immerse yourself in the world of Genus Dei S.r.l. products. Just scan the box to view the extra content (videos, additional images, technical data sheets). With this QR code you will be able to attend a radio interview to learn more about our company.

Is Genus Dei S.r.l. an Italian company?

Yes it is. Genus Dei S.r.l. was born and produces its products in Italy, in its factory located in Albano Laziale in the province of Rome.

Can I become an exclusive reseller for Genus Dei S.r.l.?

Sorry, no. Company policy does not include exclusive agreements in order to allow all customers around the world to have access to our products.

How long does it take to reply to an e-mail or a Whatsapp message?

Genus Dei S.r.l. guarantees a response within 24 to 48 hours from the receipt of the e-mail message. If you experience longer waiting times, please contact us by phone.

PRODUCTS

TRAYS

With polypropylene trays certified for food contact, Genus Dei S.r.l. inaugurated its factory way back in 2008. With a unique and captivating design, they are available in 4 collections, 18 models and 30 colors, representing the ideal solution for any type of use.

CASES

The line of polyethylene cases is expanding every year retaining its position as one of the best sellers, in the Genus Dei S.r.l. products. All the cases are certified for food contact use and are ideal to store, preserve and differentiate the dough.

PIZZA BOXES

New food-grade pizza boxes for take-away and delivery services which are now officially part of the environment-friendly collection of Genus Dei S.r.l. In fact, with the new regulations for the reuse of plastic, they win a place at the forefront of «green» products.

RACKS

The polypropylene racks for washing dishes represent one of the most innovative solutions on the market: with their extensibility in height, they can adapt to any type of glass and, thanks to the customizable compartments, they are also useful for other types of dishes. They are also useful for storage and handling, together with their complementary accessories.

Does Genus Dei S.r.l. provide food suitability certifications for its products?

Yes it does. Genus Dei S.r.l. ensures MOCA certification on its products, necessary to protect the health of consumers and ensures compliance with mandatory requirements in terms of food hygiene. Objects intended to be brought into contact with food products are considered to be MOCA items.

CASES

The city of Naples, home of pizza, is the perfect setting to introduce you to our line of cases for pizza dough, pasta dough and much more.

Scan the QR code with your smartphone to find out all the features of our cases.

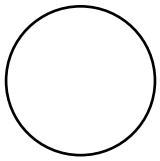

Fun fact: The history of pizza dates back to 17th century, since it was only after this period that European explorers brought tomatoes to Italy. At first people avoided eating them because they believed they were poisonous, but suddenly the poor inhabitants of Naples started using the tomato on top of focaccia to feed themselves. Since then, Italians have perfected the dish and today there are 15,500 pizzerias and more than 1 million pizzas are baked every day, just in the city of Naples. This is why cases for storing the dough are essential for the success of the pizza and for keeping the culinary tradition of these pizzerias alive.

TECHNICAL FEATURES

- **Cases in polyethylene (PE-HD) certified for food contact use**
 - **Compliant with current European regulations**
 - **They do not absorb odors and are easy to clean**
 - **Resistant and light**
- **Raised bottom to avoid contact with other stacked cases**
- **Perfectly stackable to prevent the entry of dust and impurities**
 - **Ideal for storage and transport**
 - **Professional dishwasher safe**
- **Resistant to thermal shocks from -40°C to +80°C**
- **Compatible accessories for storage and transport**

COLORS AND CUSTOMIZATION

Make your cases unique by choosing among **6 colors** and embossing your logo

Natural White

For pizza dough, pasta dough, bread and dairy products. This is the best selling color and the most used in the world of foodservice.

Graphite Black

By choosing one of our black cases, you will receive a discount and you will contribute to saving the planet, because the plastic used is 100% recycled and 100% recyclable.

Blue Lilac

To indicate foods which avoid intolerant reactions such as gluten-free dough for coeliac sufferers, who are allergic to gluten.

Traffic Red

For meat-based foods or 72h dough rising

Mint Green

For vegetable-based foods or 36h dough rising

Light Blue Genus Dei

For fish-based foods or 24h dough rising

PIECES IN 1 PALLET	164 pcs

GUARANTEE SEAL	
CODE	SIG01
PACKAGING	500 pcs

Special holes to facilitate the exit of the steam and to keep the pizza crunchy inside the container.

Bottom with rounded ridges to prevent the pizza from sticking to the base.

TRAYS

Rome is the ideal city if you are looking for good food and traditional locations immersed in centuries of history and culture. In recent years, the Italian capital has about 34,000 catering businesses and among these, fast-food restaurants and canteens that use trays have significantly increased.

Scan the QR code with your smartphone to find out all our trays and how are they used.

Fun fact: In ancient Rome it was customary to organize banquets for which you had to think about preparing the table and the room where you ate, called the *triclinium*, from the name of the beds on which the guests lay down. Because of the fact that the food was eaten while reclining, trays were widely used to arrange the food, often in a decorative way to amaze the guests and entice them to eat. Today, the role of the tray has a different use, but its birth has its roots in the banquets of the ancient Roman Empire.

TECHNICAL FEATURES

- **Trays in polypropylene (PP) certified for food contact use**
 - **Compliant with current European regulations**
 - **Scratch and stain resistant**
 - **Unaffected by chemicals**
 - **Superior resistance to breakage**
 - **Rounded and reinforced corners**
 - **Washable in professional dishwashers**
- **Resistant to thermal shocks from -20°C to +85°C**

RACKS

We have to go to the city of Milan, the heart of Italian nightlife, to present our adjustable racks, able to accommodate the height of any glass.

Scan the QR code with your smartphone to find out how our racks work.

Fun fact: In Milan around 40% of aperitifs are consumed, mainly wine and prosecco, which implies the continuous use of glasses and flûtes. Our racks for washing glasses are widely used for optimal washing and storage of glasses in about 17,000 businesses throughout the city.

TECHNICAL FEATURES

- Racks in polypropylene (PP)
- Compliant with current European regulations
 - Assembled and ready for use
 - Perfectly stackable
 - Ideal for storage and handling
- Ergonomic handle that facilitates lifting
- Extendable corners to adjust the height up to 34 cm
 - Open side for effective washing
- Compatible with professional dishwashers
- Resistant to thermal shocks from -20°C to +95°C
- Compatible accessories for storage and transport

HOW TO CHOOSE THE RIGHT RACK AND HOW TO DIFFERENTIATE IT WITH COLORS

1. Measure the diameter

Measure the maximum diameter of the glass to determine the size of the compartments.

2X2	4 compartments of 226 mm	From 147 to 226 mm
3X3	9 compartments of 146 mm	From 114 to 146 mm
4X4	16 compartments of 113 mm	From 89 to 113 mm
5X5	25 compartments of 88 mm	From 74 to 88 mm
6X6	36 compartments of 73 mm	From 64 to 73 mm
7X7	49 compartments of 63 mm	From 0 to 63 mm

2. Measure the height

Measure the height of the glass to determine the type of KIT.

KIT 1	From 0 to 65 mm
KIT 2	From 65 to 120 mm
KIT 3	From 120 to 240 mm
KIT 4	From 240 to 340 mm

3. Differentiate the rack

It may happen that glasses with different shapes have the same diameter and the same height, requiring the same type of rack. To differentiate the contents of the same racks, colored tops are the ideal solution.
